

Health Effects of Gulf Oil Disaster

Forum

Saturday, February 5th, 2011

3:00 p.m. to 5:30 p.m

First Unitarian Church

5212 S. Claiborne.

New Orleans, LA 70115

In independent testing, residents of the Gulf Coast are testing positive for chemicals associated with the Gulf Oil Disaster. In independent testing, seafood is showing high levels of those same chemicals. What does this mean for all of us?

Principle Speaker - Dr. Wilma Subra, Louisiana Environmentalist. Interviewed recently in the award winning documentary "Gasland". Will report on recent tests results on the Gulf Coast.

Forum participants

Cherri Foytlin - Co-founder, Gulf Change, based in Grand Isle, Louisiana

Denise Rednaur - Resident, Longbeach, Mississippi

C.J. Toxclair - Unemployed Shrimper, Louisiana resident

Robin Young - Guardians of the Gulf, Orange Beach, Alabama

Discussion to follow, audience participation.
